

# Building a Digital Landscape

A partnership between Newgen Software and KHUSHII

**“The digital intervention is impacting around 4218 students, most of them are first gen school goers and are from the less privileged communities.”**

Through a virtuous partnership with our implementation partner KHUSHII, Newgen has extended its support for digital intervention in adopted schools across Harkesh Nagar and Tekhand, along with new additions at Indira Kalyan Vihar and Satbunga (Uttarakhand).

This initiative has brought about a remarkable change in teaching and learning methods, making them more engaging, interactive, and adaptable to the diverse needs of today's students. Newly acquired computers have been utilized to establish computer labs across all these schools, with the aim of aligning children with technological advancements.

This digital intervention has impacted approximately 4,218 students, most of whom are first-generation school-goers from less privileged communities. Students have been introduced to computer history, types of computers, do's and don'ts while working on computers, computer room etiquette, and software such as Notepad and MS Word.

This collaboration stands as a beacon of change, fostering a brighter future for these young minds. We remain dedicated to furthering these initiatives, striving to empower more students and communities through the power of education and technology.
