

## NDDP TEACHERS FEEDBACK

*“Effective teachers feedback reflect student’s capabilities, learnings & challenges”*

Teachers are the backbone of any institution and the support system for all students. Effective feedback from teacher’s aide to reflect student’s capabilities, learnings, challenges etc. NDDP is thankful to all the teachers for taking out time from their busy schedule and help us to understand the impact of NDDP and further steps to drive forward the project.

### Feedback by the school teachers:-

*“I have noticed better performance of children in my class. Now the shy students have started responding probably because of NDDP sessions. Also, overall level of the students has increased a lot. I would thank NDDP as they are so thoughtful for these children and work so hard. In my family I have seen positive effects of the sessions too. My niece Yogita attends all NDDP sessions without a miss. She has got a NDDP device which is helping her a lot in her studies.”*

– LALITA (Class-7<sup>th</sup> Sanskrit Teacher, Harkesh Nagar)

*“Yes, NDDP has helped me a lot. The way you make students understand chapters through AVs is very different. These types of sessions are much needed in government schools. I have seen really positive changes in students. I would request, if possible help students with map work, it will help us too.”*

– POOJA RANI (Class-6<sup>th</sup>, SST Teacher, Harkesh Nagar)

*“Some students told me about NDDP sessions and the techniques used to teach different topics. I know students who were not participative in class earlier but now they come forth to share their views with confidence. I have a request, one of my students does not participate in class, I have tried various methods but nothing worked. If NDDP facilitators help her there might be some improvement”*

– ANUKRITI (Class-7<sup>th</sup>, Science Teacher, Harkesh Nagar)

*“I had to think twice before assigning online homework to students, as some of them did not have a smart device at home to work on. NDDP solved the issue by distributing Tablets to the students, they really needed. Now they do online research on different study topics and complete their homework. Most class 6<sup>th</sup> students often discuss about NDDP sessions and tell me the way all facilitators encourage them in studies and other topics. I feel students are very excited to join the NDDP online sessions. ”*

– SEEMA (Class 6<sup>th</sup> to 8<sup>th</sup>, Science Teacher, Harkesh Nagar)
