

The NDDP BENEFICIARY “Dreamers. Thinkers. Doers”

Tanu (Name changed)

11-year-old Tanu (name changed) turned heads as her euphonious voice echoed in the classroom when she conveyed her thoughts on smart devices as a boon.

A VIth grader with a thirst for knowledge, has become a role model in her own class. Her confidence has persuaded her classmates to actively engage in productive discussions. Tanu is a beneficiary of the Khushii Program (Newgen’s implementation partner) through which she has developed a strong command over language and built foundational skills.

As a new enrollee of our NDDP Program, she narrates how the classes have added a layer of freshness to her academic journey. Tanu says, “Whenever I enter the NDDP lab, I look forward to watching the informative AVs and receiving warm greetings from my facilitators as they begin the sessions by asking about our well-being.”

Tanu considers this program a great opportunity for her personality and self-development. She looks forward to being part of this program for a long time.
