

## Why I Aspire to be a Teacher

NDDP conducted a career counselling session with the alumni aged 15-18 years on May 17, 2021. The session focused on teaching as a career choice. It followed a systematic process to guide students in making an informed decision. They gained an understanding about teaching as a career opportunity and the available options. The session was attended enthusiastically by all the students.

When asked, "Why do you want to be a teacher?", this is what the students had to say:

*"I aim to be a teacher because I want to share my knowledge with children and contribute to our country's development since children are the future of a country!"*

- Ranjana

*"Teaching is not just a profession but the joy of life for me!"*

- Nargis Ansari

*"I feel that becoming a teacher is the only profession that will give me satisfaction because I will be able to assist many students, like me, to achieve their goals."*

- Kripa

*"I love learning about new things and sharing them with others. I can share my learnings with a large number of students through this profession. Becoming a teacher will make my parents proud of me."*

- Shalu Subhash

*"I want to become a teacher because I am inspired by my teachers at school and NDDP. I want to be like them and bring a positive change in the lives of thousands of students."*

- Ariba Bi

*"For me, teaching will be the right profession because I love to communicate with people. I want to help those who cannot afford education and help them fulfill their dreams with hard work."*

- Ritu Sahu
